Percentage: 89.20%

INTERNSHIPS

Web Development

Alecado Systems, Virtual

May 2022 - Jun 2022

Build frontend for the company.

Learn to work with colleagues / manager.

Discussing things in meet with manager was the best thing.

POSITIONS OF RESPONSIBILITY

Member of Solutions program

Led a team of 5 volunteers for a gaming event in which we won first prize.

TRAININGS

Web Application Development

udemy, Online

Jun 2021 - Jul 2021

This was one of the best course I've done. I learn many things including HTML , CSS, JAVASCRIPT , REACTJS and many other things.

Web Application Development

YouTube, Online

May 2021 - May 2021

CodeWithHarry literally helps beginners to learn small aspects of Language.

NoInstaClone

Jul 2022 - Jul 2022

<https://denver04.github.io/NoInstaClone/>

Similar website(but I was not cloning) to Instagram. Fully responsive. Sticky navbar with beautiful design. Images always changes on each refresh. You can like the post by double tapping over image. Only ReactJs is used. Footer is also provided.

To-Do App using React-Native

May 2022 - Jun 2022

<https://expo.dev/@medenver/ToDoApp>

This is my Application which I made using pure React-native. It does the job of adding your Todos into the homepage and gives you a reminder. I used many libraries in this project. I remain with the normal font-style :P .

Riot-Users

Jun 2022 - Jun 2022

<https://denver04.github.io/Riot-User/>

Website contains the CRUD application, made using pure ReactJs and Redux. In this, you can add, delete, and update user info. Also used toasting package to display the error, and success messages. Used the table to show the data. Not responsive.

Aimore-Food-Website

Jun 2022 - Jun 2022

<https://denver04.github.io/Aimore/>

In this, I used ReactJs and Redux only. You can add and remove item from cart. Not build the cart page though, just watch the cart icon. Not responsive though. Effects added on the food card and buttons. Routing is done also.

Google keep Clone

Nov 2021 - Nov 2021

<https://github.com/Denver04/Keeper#keep-app-clone>

It is a clone of Google Keep App. I've used Reactjs to make this. I've tried to make it as much similar as I can. You can delete/add the notes.

Simon game

Jul 2021 - Jul 2021

<https://denver04.github.io/HostingSite/>

It is a simple game made using pure JavaScript , called it Simon Game . It's a buzzer game which we have to press in sequence. This game is just to build your memory power stronger and also helps in building your concentration stronger .(Only for PC)
